## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-44, drawn to a surveillance system, classified in class 348, subclass 143.
- II. Claims 45-48, drawn to a method of detecting radio frequency link performance, classified in class 375, subclass 224.

The inventions are distinct, each from the other because of the following reasons:

Inventions I. and II. are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as detecting radio frequency link performance. See MPEP § 806.05(d).
